

Cockroaches in your vehicles, trucks, buses or homes? Now you can DIY with:

Makfor F Roach Bait Gel (Bayer) is used as an effective crack and crevice treatment to achieve a rapid reduction of roach populations indoors and out.

Active Ingredient:	Fipronil 0.05%
Target pests:	American, Brown-banded, German, Smoky brown, Oriental
For use in:	Keep tightly capped and use within 2 years. Do not spray near baits, do not use heavy detergents or cleaners, or do not use in very dusty area. Gel will dry out and get a dry skin on top but roaches will still eat it up to a year. However, if contaminated or gone, reapply.
Application:	1 tube treats 30-120 square yards depending on infestation. Smaller, more frequent gel placements provide faster control than larger, less frequent placements.
Yield:	Good IPM program does rotate baits (bait with different active ingredient) as roaches may not be attracted to the bait matrix of what is being used anymore.
Payment terms:	<p>RM. 130 per tube.</p> <p>Courier Charges: Rm.10.00/tube</p> <p>Our account details: Bank name : Hong Leong Bank Berhad Acc no : 06400065261 Account name : Stopest (M) Sdn Bhd</p> <p>Provide details for payment: Customer name: Contact no: Address: Product name:</p> <p>Please direct payment notification to: 1) lesIEWG@stopest.com.my (Leslie) 2) wan@stopest.com.my (Wan)</p>
Manufactured By:	Bayer
